

## **TECH RIDER for Installations for Spectropia show**

1 computer – Macintosh – per installation. (G4/G5 2ghz or Intel Core Duo 1.6666 ghz minimum)

IIDC Firewire camera – iSight or Unibrain Fire-I or other IIDC camera.

Computer speakers or mixer plus powered speakers or amp plus speakers for stereo audio playback.

Projector or flatscreen video monitor (min 27”) – 16:9 aspect ratio (widescreen)

For monitor version – monitor hangs on wall with camera mounted on top – needs to face into portion of the space where there is not a lot of traffic in front of the lens and light levels are steady. The camera should only see person standing in front of the monitor.

Projector version needs darkened space and same as above with a dimly lit portion of the space in front of the camera where viewer stands.
